

Refael Harush

AI Implementation & Automation Specialist

Israel | +972 52-854-0475 | refael00111@gmail.com | linkedin.com/in/refaelyharush | refaelyharush.com

SUMMARY

I build WhatsApp bots, AI agents and n8n automations, and connect them to systems like payments, email and lead management. I built Y Community, which has more than 230 registered users. The code is written by coding agents (Claude Code) under my direction; I write the spec, test it and ship it. I have taught about 100 private AI lessons to 27 paying clients.

Looking for a full-time AI implementation role.

SKILLS

Implementation: process mapping, writing bot prompts, quality review of AI replies, user training

AI: Claude Code, Claude, ChatGPT, ElevenLabs

Automation and integrations: n8n, WhatsApp Business API, Telegram Bots, Webhooks, iCount, Resend

Systems: Next.js, PostgreSQL / Supabase, Docker, Linux (working through coding agents)

EXPERIENCE

Product and AI Implementation | Y Community (own venture)

2025 – present

- Launched a community and learning platform with more than 230 registered users.
- Built WhatsApp and Telegram bots that answer inquiries and send people to book a lesson on the site. Reviewed 1,604 of their replies, found 44 promises the bot could not keep, and rewrote the prompts.
- Built a Hebrew voice agent that answers phone calls and asks a few questions, like a receptionist.
- Built an AI news engine that summarized and published 413 stories on Instagram and Facebook, and pauses itself on Shabbat and holidays.
- Connected payments (iCount), email (Resend), lead management and n8n automations. When I found the system saw only a small part of real revenue, I added a daily sync of receipts from iCount.
- Ran more than 1,000 Claude Code sessions in four months, covering spec, testing and release.
- Built all of this alongside a full-time job as a security guard.

AI Tutor | Self-employed

2025 – present

- Taught about 100 private AI lessons to 27 paying clients.
- Prepared a 42-lesson training kit with slides and exercises.

Partner, Marketing and Product Testing | Shvtzak

2026 – present

- An AI shift scheduling system. My partner does the development; I handle marketing and test new versions.

EDUCATION AND SERVICE

Military service, Kfir Brigade (not called up for reserve duty)

11/2021 – 03/2024

Hesder Yeshiva Sderot

2020 – 2022

Full Israeli matriculation (Bagrut)

2020

LANGUAGES

Hebrew: native. English: good reading, intermediate writing and speaking.
